

**PARASPORT**  
SKYDIVING EQUIPMENT

# **SYNCHRO**

TOP PERFORMANCE JUMPSUITS

Parasport's jumpsuits are the result of 20 years of experience, high quality fabrics and high technology. All our jumpsuits are designed with CAD/CAM techniques combined with LASER cutting systems. The fabrics we use are strong and long lasting, distributed according to aerodynamics to satisfy the demand of formation skydiving specialists.

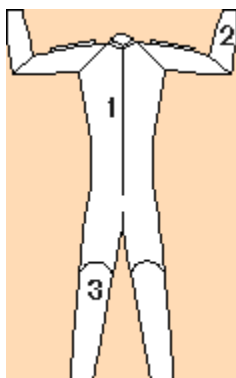

The Synchro jumpsuit's range is made of 5 different models to accommodate different skills and needs allowing different choice on legs and grips:

- Synchro REGULAR
- Synchro BOOTIES
- Synchro TOTAL BLAST
- Synchro COMPETITION
- Synchro AFF

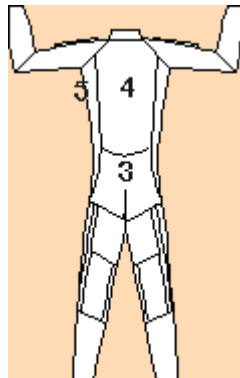

## CUSTOMIZE YOUR JUMPSUIT!

You can customize your jumpsuit with different colors and embroidery. Try to configure your jumpsuit on our on-line configurator. ([www.parasport.it](http://www.parasport.it))

FRONT

BACK

### Choice of colors

1. Fall rate (nylon or polycotton)
2. Forearm (stretch or polycotton)
3. Back and legs (polycotton)
4. Shoulders (stretch material)
5. Side strips (stretch material)
6. Grips (lightweight Cordura)

Every jumpsuit is custom made. We only need 6 measures to make your jumpsuit: just follow the measurement guide provided with the order form and fill your order!

The **Synchro Regular** is the Synchro version with plain leg.

#### STANDARD ON SYNCHRO REGULAR:

- Plain leg
- Cordura grips
- Inside leg grips
- Choice of speed/standard front
- Choice of stretch/polycotton forearms
- Choice of low collar

You can also choose if you want Cordura reinforcements on knees and in double fabric on back and GFX pocket on stretch forearms only.

The **Synchro Booties** jumpsuit is equipped with our own design bootie, that offers not only a toe but also a heel to keep the bootie in place in any flight condition.

#### STANDARD ON SYNCHRO BOOTIES:

- Booties
- Lightweight Cordura grips
- Inside leg grips
- Choice of speed/standard front
- Choice of stretch/polycotton forearms
- Choice of Choice of low collar
- Choice of elastic heel

Applicable options are reinforcements in Cordura on knees and in double fabric on back, Cordura booties and GFX pocket on stretch forearms only.

The **Synchro Total Blast** is equipped with the unique Parasport's Total Blast bootie.

The TOTAL BLAST is the original Parasport design to improve the power and the efficiency of the booties option. The Total Blast creates a stiff air tube from the knees to the ankle to allow faster and more effective movements. As in the regular bootie, the shoe part is kept in place with a toe and heel part. A tape on the heel helps in removing the Total Blast on the ground or under the canopy. Is also available the elastic heel.

### STANDARD ON SYNCHRO TOTAL BLAST:

- Powerful Total Blast bootie
- Lightweight Cordura grips
- Inside leg grips
- Choice of speed/standard front
- Choice of stretch/polycotton forearms
- Choice of low collar
- Choice of elastic heel

Available options are reinforcements in Cordura on knees and in double fabric on back, the more powerful Total Blast bootie made of Cordura and the GFX pocket on stretch forearms only.

The **Synchro Competition** is the Parasport top design and currently recognized best performing Formation Skydiving jumpsuit. This outstanding suit is complete of every possible option to satisfy the professional formation skydivers' needs.

Top teams in the World rely on the Synchro Competition in both training and competition.

### STANDARD ON SYNCHRO COMPETITION.

- Cordura Total Blast
- Reinforcements
- Lightweight Cordura grips
- Inside leg grips
- Double grips on arms
- Padded knees
- Choice of speed/standard front
- Choice of stretch/polycotton forearms
- Choice of low collar
- Choice of elastic heel

The Total Blast is in Cordura. This tough fabric makes the air tube on the legs stiffer, improving the power of the regular Total Blast.

Also the reinforcements on padded knees are in Cordura and in double fabric on back. You can also choose the speed fall rate, using nylon on front, or the slow fall rate, in polycotton. The forearm can be in stretch material or, if you prefer, in polycotton, helping in flying the mantis position.

You can also choose to apply on the stretch forearms only the GFX pocket.

### **Synchro X-Ray**

The Synchro jumpsuit is also available for camera flyers: it's the Synchro X-Ray, available with plain legs, regular Bootie or Total Blast Bootie.

The **Synchro AFF** jumpsuit is the basic model created for accelerated freefall students as a superior first jumpsuit. The AFF version has plain leg and single grips on legs.

## STANDARD ON SYNCHRO AFF:

- Plain leg
- Lightweight Cordura grips
- Choice of speed/standard front
- Choice of stretch/polycotton forearms
- Single grips on arms
- Single grips on legs
- Choice of low collar

Applicable options are reinforcements in Cordura on knees and in double fabric on back, Cordura booties and GFX pocket on stretch forearms only.
